Project Name	Plugging Into the Future: An Exploration of Electricity Consumption Patterns
Maximum Marks	2 Marks

Problem Statement Template

Problem Statement (PS)	I am (Customer)	Trying to	But	Because	Which makes me feel
PS-1	a policy planner / energy analyst	compare electricity consumption across Indian states and over time	the raw data is scattered across disconnected files and inconsistent formats	there is no single cleaned, structured, and queryable source	unable to make timely, well-informed planning decisions
PS-2	an end user viewing the published insights	understand consumption trends without technical tools	dashboards and reports aren't easily accessible in one place	the insights are locked inside spreadsheets or desktop-only tools	frustrated at not being able to explore the data myself
